

QUALIFICATION AND VALIDATION IN FOOD, LIFE SCIENCE, PHARMACEUTICAL INDUSTRIES AND RESEARCH LABORATORIES.

Evidencia GmbH is a service provider in the field of process validations and qualifications of autoclaves and equipment in which process monitoring is controlled by pressure and/or temperature. We prepare GMP and GLP-compliant qualification and validation documentation for our customers. Qualifications and validations are carried out on site by our well-trained technicians, using high quality measuring equipment which can be traced back to a national standard.

We maintain a quality management system to **ISO 9001** in order to meet the high quality standards of our customers engaged in the fields of science, research, biotechnology, pharmaceuticals, quality control and production, as well as to provide evidence that these standards have been complied with.

QUALIFICATION AND VALIDATION

Do the features of the equipment supplied correspond to all the order parameters?

Has the equipment been assembled correctly? Have all the technical specifications been complied with?

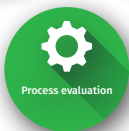

Does the equipment supplied function before introducing any product, in accordance with the specifications?

Does the equipment comply with the process requirements when a product is introduced?

LEGAL FOUNDATIONS

Essentially, qualifying equipment involves providing proof that the equipment and technology used are suitable for the proposed task, are in perfect working order and deliver results complying with the requirements. The requirement to carry out a qualification is prescribed by laws whose implementation is governed by ordinances which are in turn based on detailed requirements set out in pharmacopoeias, guidelines and standards. This stands for Good Laboratory Practice whose guidelines apply to laboratories carrying out non-clinical laboratory studies. GLP issues guidelines to these laboratories to ensure the quality of the results of laboratory studies you carry out. Manufacturers to whom the EU guidelines for good manufacturing practice apply include manufacturers of medicinal products, active substances, cosmetics as well as foodstuffs and animal feed.

SERVICES AT A GLANCE

CONTACT

Please contact us for further information about Qualification and Validation of your equipment. We are happy to help you!
